Non-Pytha users can easily open the files and check the complex plan in 3d using the new free Pytha viewer. This adds great value as the Pytha cad drawings can be examined well in and out before further sending it for production. The accounting team can also use Pytha viewer and make accurate estimates based on the 3d drawings. Pytha Viewer Use Case PYTHA viewer helps the user to navigate the file using a 3 button mouse. The user can easily change the view from the ribbon bar and can pan or zoom a scene easily in 3d. Furthermore, the scene can be changed to shaded with materials or completely transparent with solid off, this gives an amazing experience to the user for expressing his ideas to the designer and evaluating the perfection in the file. Pytha v25 viewer also allows the user to check and measure the dimensions, radius, and angle in 2d or 3d. Pytha viewer also allows the user to check the plotting and technical details if given in the project by the designer. Who can use Pytha v25 Viewer Architects, Interior Designer, Estimators, Production Engineers, machine operators, or anyone related directly or indirectly to a design to machine project can use Pytha viewer. Pytha Viewer v25 System Requirements Pytha viewer v25 will run Windows 7, Windows 8, Windows 10 & Windows 11 Pytha Viewer needs a minimum dual-core processor. A minimum of 2GB of graphics cards is required for smooth viewing of the scene. 8Gb of minimum ram is required to handle the bigger and more complex scene. Pytha Viewer Supports both Intel ARM processors too. make sure to download the correct version from the link below. The new powerful smart parametric functions, allow you effortlessly modify your designs within seconds. Download PYTHA Wood Working Brochure. PYTHA is able to create 2D Shop Drawings without the need for the designer to export the file to AutoCAD. Once the 3D model is completed, PYTHA can create the various views that are needed to produce a shop drawing. These include sectional, elevation, detailed and isometric views. All the views created by PYTHA can be annotated i.e. users are able to insert dimensioning and text details easily. These views are also 'live' and when a user updates the 3D Drawing, the respective 2D drawings along with the annotations will also be automatically updated. Therefore, if the designer makes changes to the cabinet length, the dimension text for the cabinet length will be modified automatically. In a traditional workflow, the designer would have to export the 3D Views to AutoCAD. After which the designer will need to use AutoCAD to create the sectional, elevation and detailed view to create the shop drawing. This is a tedious process which requires the designer to manually sketch out every view. When a change is done to the 3D Model, the respective 2D Drawings in AutoCAD needs to be updated manually, since the 3D and 2D softwares cannot communicate with one another. With PYTHA, the designer is able to do up shop drawings up to 90% faster than traditional methods as well as complete the revisions without a need to rework on the 2D Drawing in AutoCAD. With PYTHA 3D CAD, you can model anything! See how easy it is to model a kitchen here. Download the free PYTHA VIEWER, and explore the model of this kitchen in depth.
